## PRESS RELEASE

### Calzone Case Company Introduces iSeries Cases

Leading case manufacturer Calzone Case Company has announced the introduction of a new line of case products, the iSeries. Designed to bridge the gap of quality vs. price in the U.S. market, the introduction is big news for customers who aspire for a Calzone Case, but think it is beyond their budget. An import line of musical instrument, rack and DJ cases, iSeries is poised to take its place alongside other industry standard case products from the Bridgeport, Connecticut-based manufacturer.

According to President Joe Calzone, the company has for the past few years exhaustively researched global manufacturing opportunities; the result is a case (with a Lifetime Warranty) built to the company's exacting construction standards. "We searched the globe to produce a line of imported case products worthy of the Calzone name," says Joe. "If you look at other import products, you'll see they are all pretty much the same case. We've wanted for some time to offer a better product, and it's taken a lot of work, but now we have the iSeries, and our customers are going to be very happy!"

iSeries Case standard features include ATA style construction, ABS Covering, 1/4" or 3/8" plywood, Ribbed Double Angle aluminum frame, Tongue and Groove Valance, Heavy Duty Steel Ball Corners / Recessed Twist Latches, and plush covered molded interiors. Wheeled cases are available for larger models.

The Calzone Case Company will unveil the iSeries product line at the 2009 NAMM Show, Booth # 4849. For more information on Calzone Case Company products, visit [www.calzonecase.com](http://www.calzonecase.com).
